

Ice skating - Year 5 - 2019

"I loved learning how to ice skate," Billy.

"I learned how to glide really quickly on the ice," Ava.

Year 5 have had the pleasure of taking part in a weekly ice skating session for ten weeks. The ice skating sessions take part at Silver Blades in Cannock.

Each week the children learned a variety of skills. The children started off by learning how to move forwards around the edge of the ice rink. When children began to feel more confident they would start to learn different movements, such as fish tail, gliding and then travelling backwards. The children also learned an invaluable skills where they learned to stop using both feet. We also learned how to get up safely if we ever fall over.

As the weeks progressed the children's confidence had really grown and they couldn't believe how well they can really skate now. The final week was amazing as they got to show their parents their amazing skills and even danced on the ice.
