

Open to Possibilities

Children cannot aspire to things that they have never encountered. Our curriculum opens their eyes to new possibilities so they can develop aspirational attitudes and understand how to achieve their full potential.

We work to broaden our children's horizons; expanding their knowledge of the world of work by nurturing their interests as well as encouraging a fearlessness of what is new or unknown.

High Aspirations

Be Adventurous

We enable them to become independent in thought and action and encourage them to imagine, enquire and become increasingly enterprising.

Pupils are encouraged to challenge themselves to gain high aspirations about what their future 'world of work' may look like.

Entrepreneurship is encouraged by engaging the children in activities that fire their imaginations towards enterprise and fund raising.
